

The MAGIwhite pool robot works with the energy supplied by the pressurized water from the booster integrated into the Magiline filter block. It sucks up rubbishes by venturi effect and holds it in a filter tray.

MAGIWHITE
Exclusive to Piscines Magiline

by **Polaris**

ROBOT MAGIwhite

Exclusive to Piscines Magiline

ENERGY SAVINGS

- 3 ultra-powerful suction jets
- Cleaning of the bottom, walls and waterline
- Large suction inlet
- Multidirectional navigation with continuous track
- Double filtration
- Easy to install: no electrical connection or additional equipments required
- Long life thanks to hydraulic technology

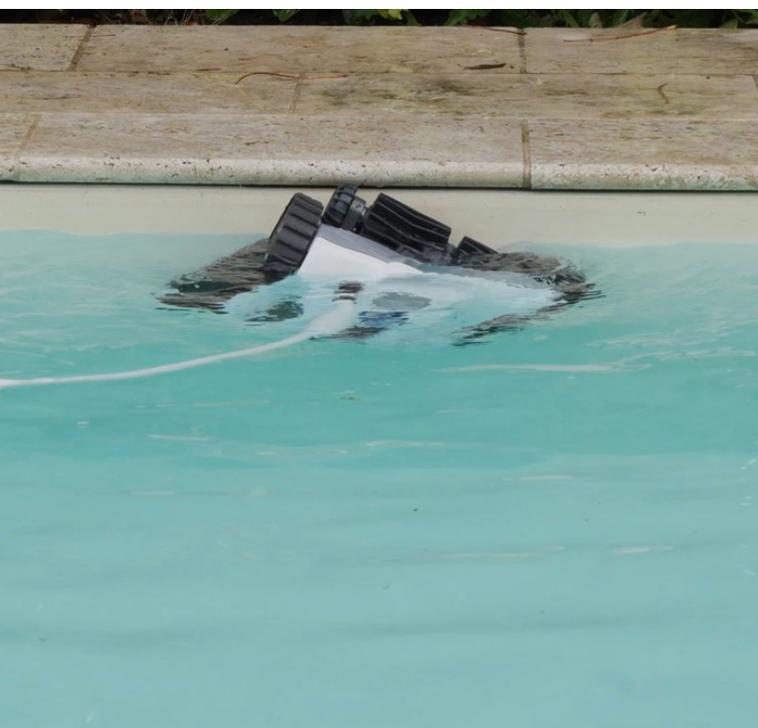

FOR WHICH POOLS?

Compatibility	Compatible with Magiline Pools equipped with a booster (MAGIclassic, MAGIprestige, and MAGIguard-X, FXV2 or NFX Pump)
Pool shapes	All shapes
Pool floor	Compound Slope / Pyramid Point / Flat / Soft Slope / Plunge Pit
Coating	Liner

DESCRIPTION

System Type	Pressure hydraulics
Displacement	Random and multidirectional
Power source	Booster coupled with filtration
Aspiration	3-jet venturi system
Waste collection	Double rigid filter / Access on top of the robot / Transparent window
Surface of action	Cleaning of the bottom, walls and water line

INFORMATIONSTECHNIQUES

Operating pressure	2,2 bars
Movement speed	16 m / min
Suction dimension	7 cm
Weight	9,75 kg
Pipe length	9.60 m (the furthest point from the pool (including stairs) must be a maximum of 9.5 m from the booster socket. If it is further away, it will be necessary to add a portion of pipe)
Filtration fineness	200 µm
Outgoing corner protection piece (stairs)	Available as standard 

With the included adapter, pair the robot directly with your Magiline FXLine or NFX filter booster at the brush socket.
